Fund Overview (continued)

Hedged) offers the advantages of an active management strategy with the highlights of a passive investment: lower turnover costs and transparent rules-based selection, while retaining high investment capacity.

The index weights constituents using four accounting factors, rather than market capitalization. These four factors include:

- Total cash dividends (*five-year average of all regular and special distributions*)
- Free cash flow (*five-year average cash flow*)
- Total sales (*five-year average total sales*)
- Book equity value (*current period book equity value*)

Traditional indices are generally based on market capitalization, which has the effect of overweighting those stocks that are overvalued and underweighting those stocks that are undervalued. A capitalization-weighted index will participate in market bubbles and fall with market corrections.

FUNDAMENTAL INDEXATION™ AS A SOLUTION

Fundamental Indexation™ is designed to overcome the limitations of traditional indices based on market capitalization. Fundamental Indexation weights its constituents based on company fundamental factors including dividends, total sales, free cash flow and book equity value, each variable not depending on the fluctuations of the market valuation. Fundamental Indexation seeks to identify the true "fair value" of each company.

HOW TO PURCHASE CLAYMORE ETFS

Claymore ETFs are listed on the Toronto Stock Exchange in the same manner as shares of a publicly-traded company. Claymore ETFs can be purchased through most brokerage accounts. They can be bought and sold throughout the day on the TSX during normal trading hours.
